DALLAS, TX 75202-2733

APR 16 2002

James H. Davis, Ph.D.
Chief, Surface Water Quality Bureau
New Mexico Environment Department
P.O. Box 26110
Santa Fe, NM 87502

Dear Dr. Davis:

The Environmental Protection Agency (EPA) has received the final document *Total Maximum Daily Load for Nutrients on Mangas Creek*. Based on our review, detailed in the enclosed document, we conclude that the TMDL listed above meets the requirements found in Section 303 of the Clean Water Act and the implementing regulations at 40 CFR 130.7. The EPA is, therefore, pleased to approve the TMDL loading contained in this document. The EPA also acknowledges that this loading will be incorporated as an update to the New Mexico Water Quality Management Plan. Please note that while included in the NMED submittal, an implementation plan is not required by current regulations and this approval does not address the existence or the adequacy of any implementation plan contained within this submission.

We commend your staff for the considerable effort that went into developing and establishing this TMDL. If you would like to discuss this approval, please contact me at (214) 665-7101 or Willie Lane of my staff at (214) 665-8460.

Sincerely yours,

Sam Becker
Acting Director
Water Quality Protection Division
